

NAVIGO NEPAL

“Where Conventionality Ends and Practicality Starts”

In Association with Gurubaa

Executive Summary

This report outlines Navigo Nepal's efforts to revolutionize education for secondary and high school students across Nepal. Our mission is to bridge the gap between academic learning and practical application, ensuring that students are not only prepared for exams but also for real-world challenges. This summary highlights our key initiatives, including the “WHAT’S NEXT?” campaign, our unique approach, and the impact of our past projects.

Why

To bridge the gap between academic learning and its real-world application.

To address the lack of exposure and clarity about students' future academic and career paths.

To empower students to navigate their educational and career paths confidently.

What

By providing tailored, interactive, and practical learning sessions that empower students to explore their future possibilities.

By offering engaging and hands-on experiences through camps, games, group discussions, and real-world scenarios.

Through comprehensive surveys, assessments, and tailored content that meets the specific needs of students.

How

Navigo Nepal conducts the "What's Next?" campaign, workshops, and sessions focusing on personal development, leadership, problem-solving, and career guidance.

Navigo Nepal collaborates with schools to implement interactive sessions, connect students with opportunities, and provide nationwide impact.

Navigo Nepal operates nationwide, providing resources, training, and support to students, helping them prepare for their future in a holistic way.

1. About Navigo Nepal

Navigo Nepal is a youth-led, non-profit organization dedicated to empowering junior high school students to confidently navigate their futures by bridging the gap between academic learning and real-world skills. We aim to equip students with the essential knowledge, skills, and opportunities needed to become capable learners, responsible citizens, and global leaders. Through interactive sessions, hands-on experiences, and nationwide outreach, we provide exposure to scholarships, career paths, and community leadership, encouraging students to explore their potential beyond the classroom. Our programs, which include informative seminars, competitions, and club management workshops, emphasize teamwork, personal development, and innovative thinking. At Navigo Nepal, we are committed to transforming the educational landscape by fostering an environment where students can discover their passions, set meaningful goals, and contribute positively to their communities, guided by our mantra: learn, lead, and lift

1.1 Problem Statement

In Nepal, many students are confined to a narrow educational experience focused solely on academic achievements. This approach often leaves students unprepared for the practical challenges they will face in their careers and personal lives. The lack of exposure to different opportunities and insufficient guidance on post-secondary options create a significant gap between what students learn in school and what they need to succeed in the real world.

1.2 The Role of Navigo Nepal

Navigo Nepal was established to address these gaps by providing students with the exposure, guidance, and skills they need to navigate their educational and career paths successfully. Our programs are designed to help students discover their interests, develop essential life skills, and gain clarity on their future goals.

1.3 Our Mission and Vision

Our mission is to empower students across Nepal by transforming their educational experience from a narrow focus on academics to a more holistic approach that includes personal development, leadership, and problem-solving skills. Our vision is a future where every student in Nepal has the knowledge and tools to make informed decisions about their education and career.

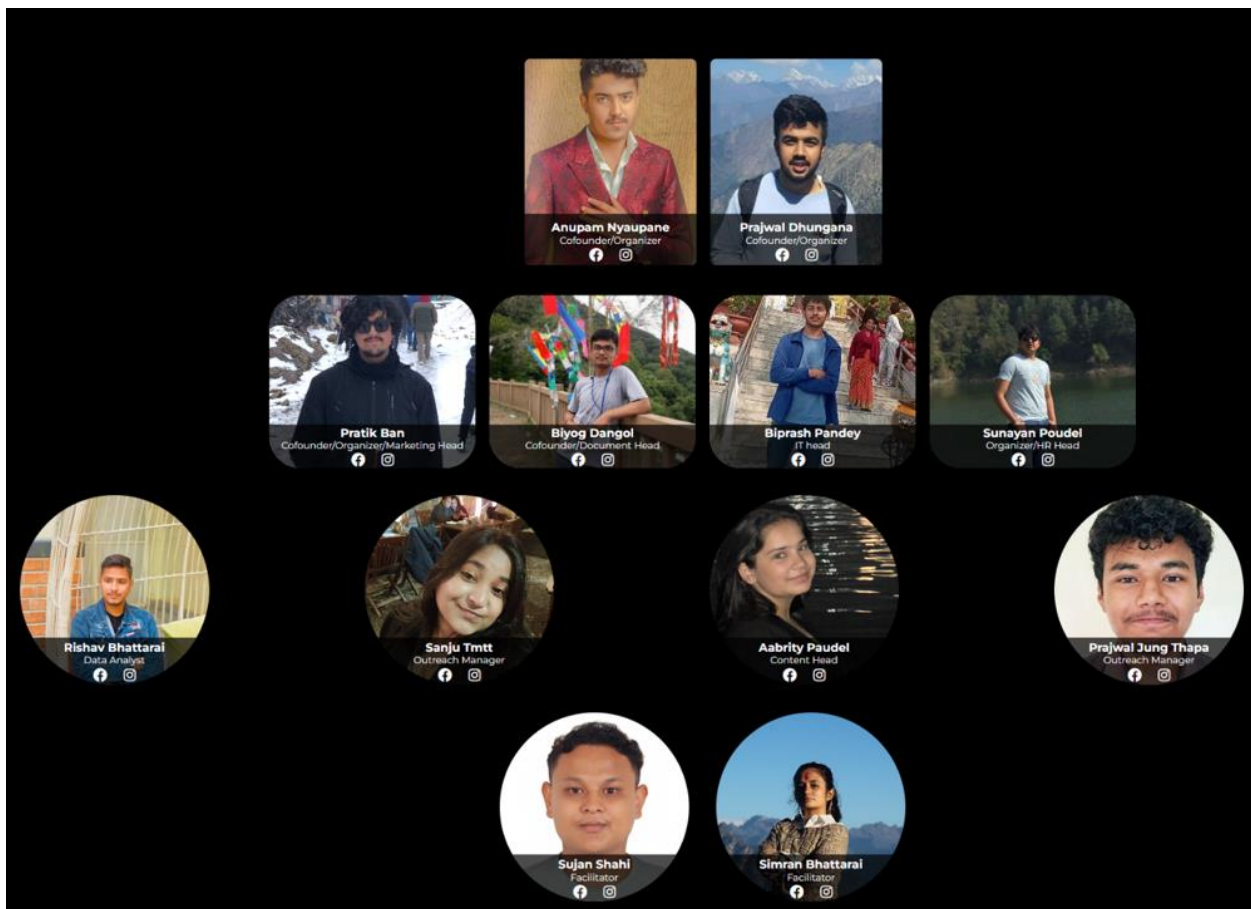

1.4 What Makes Us Unique?

Navigo Nepal stands out because we don't just advocate for change; we actively create it. Our sessions are interactive and engaging, using games, discussions, and real-world scenarios to make learning fun and impactful. We also focus on practical experiences, such as camps and workshops, to ensure that students gain the hands-on skills they need to succeed. Additionally, We aim to reach students across the country, not just in urban centers, by training local

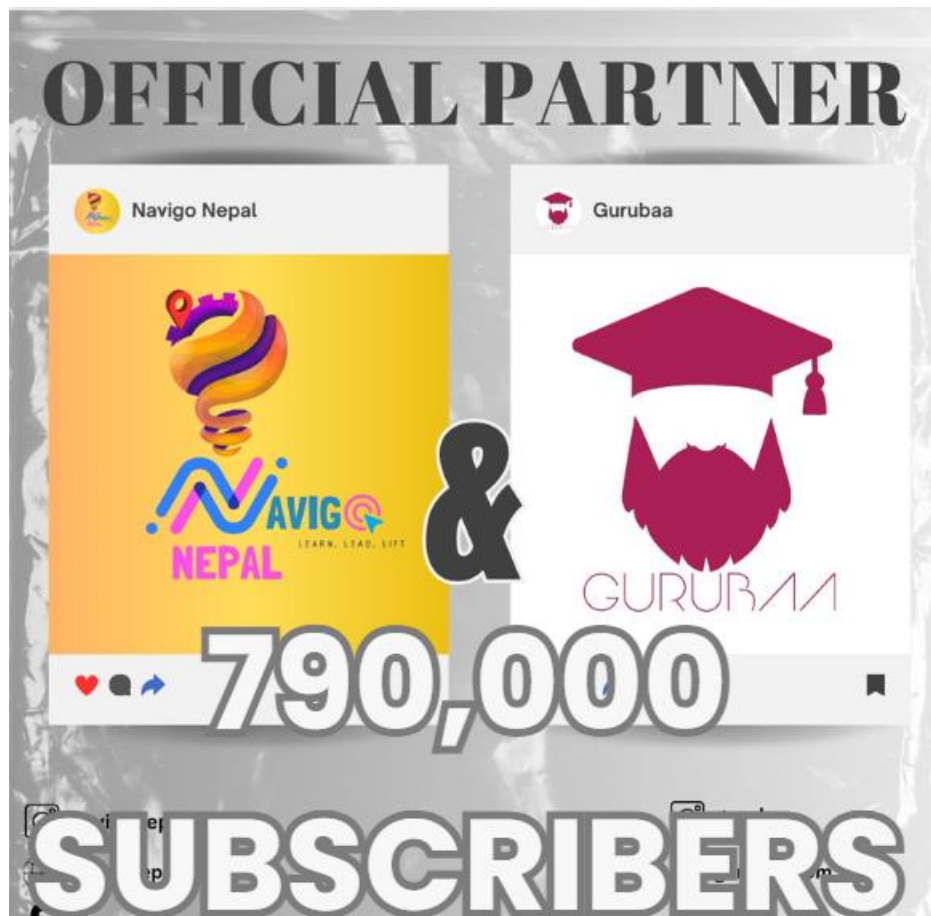

1.4 Our Cohort

Navigo Nepal was co-founded by Anupam Nyaupane, Biyog Dangol and Prajwal Dhungana. Navigo Nepal's first project included other two members along with the co-founders, who have now become Alumni: Swapnil Sapkota, who is current studying at New York University at Abu Dhabi, and Atal Raj Paudel, who is an incoming freshman at University of Texas at Arlington. The Navigo Nepal's team slowly grew along with its projects. Today, Navigo Nepal have 13 active members along with two Board of Advisors who work together to run Navigo Nepal as an organization.

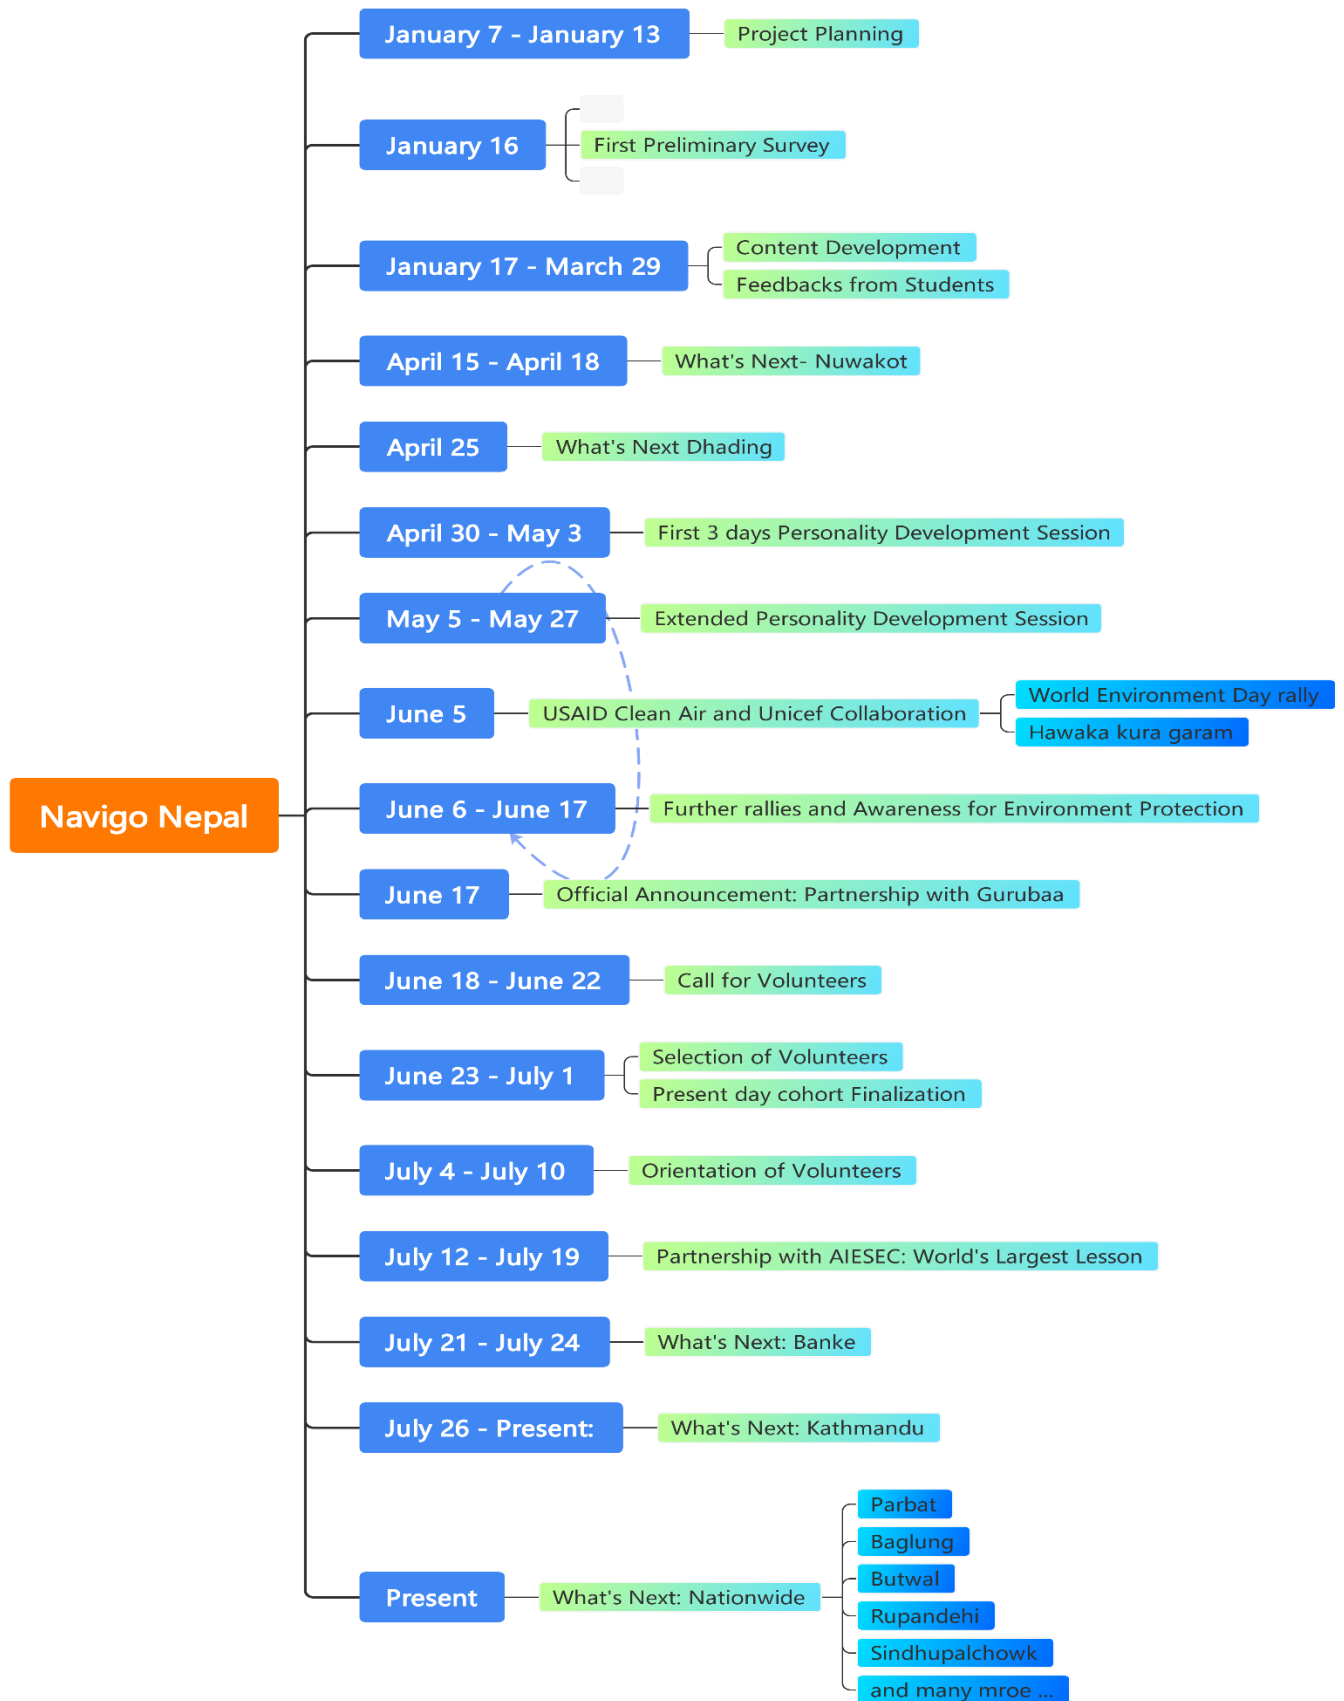

Navigo Nepal's Collaboration with Gurubaa:

Gurubaa is the Nepal's largest Educational Content Creator with over 780k followers across Youtube and with over 128 million views. Navigo Nepal have partnered with Gurubaa with a goal of providing exposure to students for their bright future ahead. Mr. Krishna Bhandari, Mr. Bijay Adhikari and Mr. Binay Adhikari, the co-founders of Gurubaa, have supported Navigo Nepal throughout the journey. Navigo Nepal and Gurubaa's partnership have given Navigo Nepal a place for conducting any meetings and also Gurubaa have helped us make website for us.

2. The “What's Next?” Campaign

2.1 Problem Statement

Many students in Nepal complete their secondary education without a clear understanding of what their next steps should be. This uncertainty can lead to poor decision-making regarding further education and career choices. The lack of guidance and exposure to different academic and career paths is a significant barrier to student success.

2.2 Objectives

The primary objective of the "What's Next?" campaign is to provide students with the knowledge, resources, and support they need to make informed decisions about their future. We aim to:

- Empower students by helping them understand their options after secondary school.
- Provide detailed information on choosing the right college and course based on individual interests and strengths.
- Equip students with the skills needed to establish and run successful student clubs, fostering leadership and teamwork.

2.3 Campaign Overview

The "What's Next?" campaign is a comprehensive program that includes counseling sessions, workshops, and hands-on activities designed to help students explore their

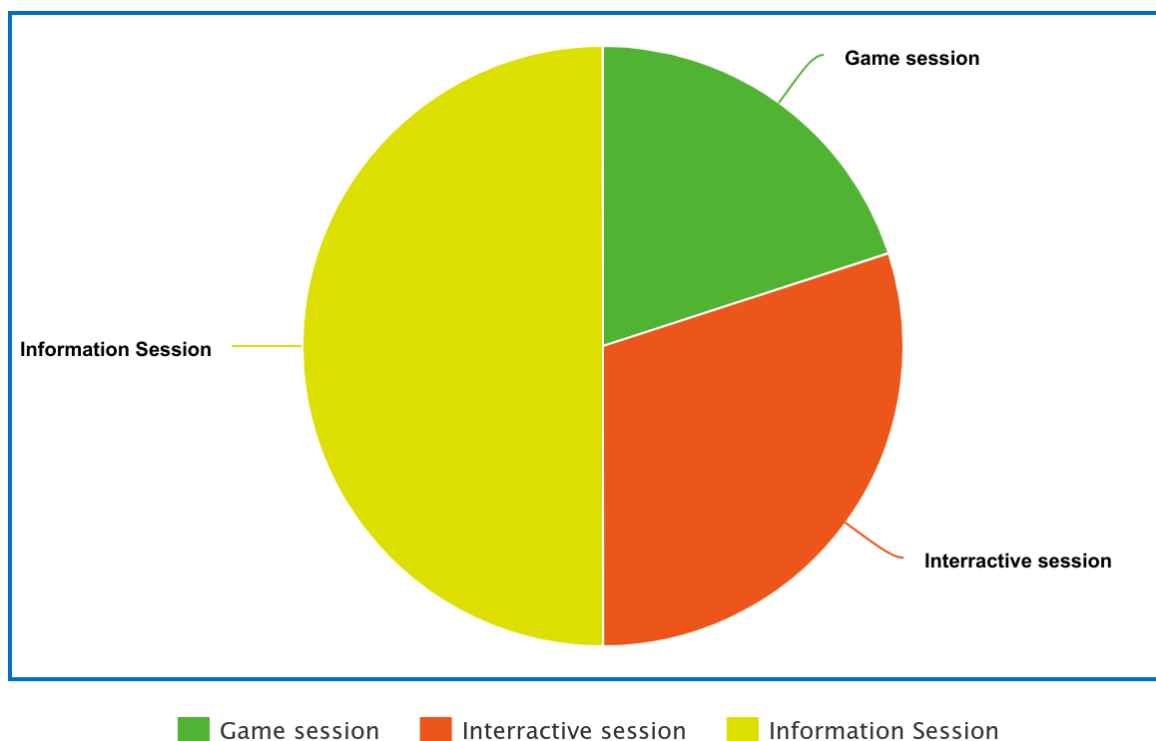

academic and career options. We begin by assessing students' needs and interests through surveys and tests. Then, we conduct interactive sessions that cover everything from college selection to skill development for extracurricular activities. Our goal is to help students see beyond the classroom and recognize the broader opportunities available to them.

2.4. Session Structure and Methodology

2.4.1 Session Overview

Navigo Nepal's sessions are designed to be dynamic and engaging, tailored to meet the specific needs of students. Each session is carefully structured to maximize student participation and learning, ensuring that the material is relevant and impactful.

2.4.2 Session Presentation Preparation

Preliminary Survey

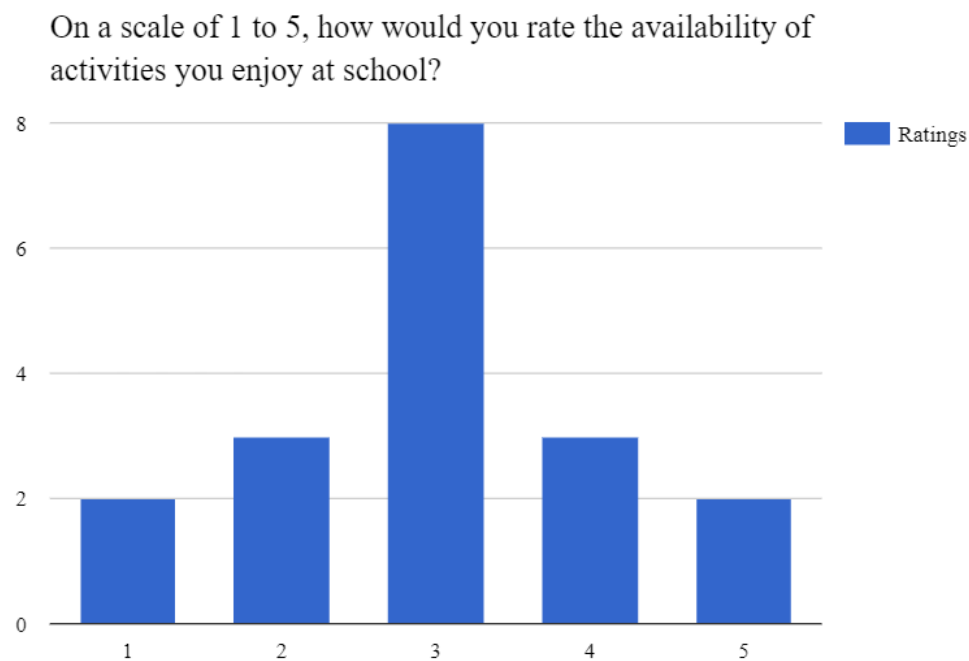

A Qualitative survey was conducted on more than 100 students of different districts and schools to know about the major problems in learning that they have been facing in their school. The survey was done in online format through zoom online call and we made

sure that every student's ideas were recorded. We analyzed their various opinions and solution measures and came up with a comprehensive project to encompass every area.

Similarly, a quantitative survey was also conducted on students of a specific school to learn about the situation of extra-curricular activities in their school. The survey was in paper format and random sampling method was employed for this purpose. Through the survey, we gained a clear picture of what we have to provide exactly while doing our sessions in the future.

{Photo of preliminary Survey}

Refinements of our presentation

We incorporate various methods of presentation in our sessions to make it interactive. In the refinement period of our presentation, we tried various ways to make our presentations, which were done through canva and MS Powerpoint. It involves pictures, graphs, games, videos and animations and less text materials to make it visually appealing and engaging. Textual information was added only when there weren't any other viable choice. Other than that, we refined our presentation by making them visually informative and engaging at the same time.

The presentation slides consists of crucial information to help students understand the various options available to them after 10th grade, including different streams, courses, and colleges. There are games like puzzles and quizzes like one which involved guessing the name of a certain famous personality by giving them hints on the various

notable works they have done. There are brain teasers as well to light up the mood of the students and ultimately to reflect upon the thinking pattern of the students. It helps to show them what critical thinking means and how it is important in the everyday aspects of our lives. Our another presentation consists of teaching students on what student clubs are and what are the various extra-curricular activities that the student need to develop themselves as a competent individual.

2.4.3 Methodologies Employed

Our sessions employ a variety of methodologies to keep students engaged and facilitate deep learning:

- **Interactive Learning:** We use games, debates, and group discussions to encourage active participation.
- **Hands-on Experience:** Students engage in practical activities that allow them to apply what they've learned.
- **Tailored Content:** Based on our initial assessments, we customize our sessions to address the unique needs and interests of each group of students.

2.4.3 Duration and Structure

Each session typically lasts 1.5 hours, with a flexible structure that includes a mix of presentations, activities, and discussions. We ensure that our sessions are not only

informative but also enjoyable, leaving students with a clear understanding of the topics covered.

2.4.4 Interactive Learning Approach

Our approach is centered on making learning an engaging experience. We initiate our sessions with ice-breaker games to set a relaxed atmosphere. Students then participate in group activities, discussions, and problem-solving exercises that encourage them to think critically and creatively.

2.4.5 Pre and Post Assessments

To measure the effectiveness of our sessions, we conduct pre and post-assessments. These assessments help us gauge the students' initial knowledge and the impact of our sessions on their understanding and skills. The results are used to refine our programs and ensure continuous improvement.

Visual Representation of where have we been

4.1 Measuring Impact

At Navigo Nepal, we believe in the importance of measuring the impact of our work. We use a combination of assessments, feedback from students and teachers, and follow-up interviews to evaluate the effectiveness of our programs. Our goal is to ensure that our sessions lead to tangible improvements in students' knowledge, skills, and confidence.

4.2 Success Stories and Testimonials

Over the months, Navigo Nepal has received numerous positive testimonials from students, teachers, and schools. These success stories are a testament to the transformative impact of our programs. Whether it's helping a student discover their passion or equipping a group with leadership skills, our work has made a significant difference in the lives of many.

4.3 Case Studies from Partner Schools

Our collaborations with various schools across Nepal have yielded valuable insights and case studies. These case studies highlight the challenges faced by students, the solutions provided by Navigo Nepal, and the positive outcomes achieved. They serve as examples of how our approach can be replicated in other schools and communities.

5. Challenges and Recommendations

5.1 Challenges Faced

Implementing educational programs in a diverse country like Nepal comes with its challenges. These include logistical issues, varying levels of student engagement, and resistance to new teaching methods. However, Navigo Nepal has consistently found ways to overcome these challenges through innovation and adaptability.

5.2 Lessons Learned

Through our experience, we have learned valuable lessons about what works and what doesn't in educational interventions. We've learned the importance of flexibility, the need for continuous feedback, and the value of involving students in the learning process. These lessons have informed our approach and made our programs more effective.

5.3 Future Recommendations

Based on our experiences, we recommend that future initiatives focus on increasing student involvement, expanding the use of technology in education, and building stronger partnerships with schools and local communities. These strategies will help scale the impact of educational programs and ensure their sustainability.

Leadership Training at Gyanodaya and Padmodaya Schools, Kathmandu

The Beginning: A Request for Change

After the successful implementation of our leadership projects at Shree Chandra Jyoti School in Nuwakot, and What's Next: Dhading, we received an unexpected but exciting request. The teachers from Gyanodaya School, impressed by our previous work, reached out to us with a special mission. They wanted us to conduct a personality development session specifically for their Scout students. It wasn't just about leadership skills—they wanted their students to see how personal growth could go hand in hand with academic progress.

We saw this as an incredible opportunity. We didn't want to follow the traditional approach of lecturing students on leadership. Instead, our vision was to make learning a fun and engaging process. We believed that the best way to help these students was to provide real-time experiences that would show them how to not only grow as individuals but also take their studies to the next level.

The Experience: Learning Through Play

When the day arrived, we stepped into Gyanodaya School with a carefully crafted plan. Rather than beginning with a typical introduction, we immediately set the tone by involving the students in interactive games. The Balloon Game and the "How Many F's" game were our way of breaking the ice while embedding

leadership lessons. These games weren't just for fun—they were designed to give students a firsthand experience of the core skills we wanted to instill in them: teamwork, communication, and critical thinking.

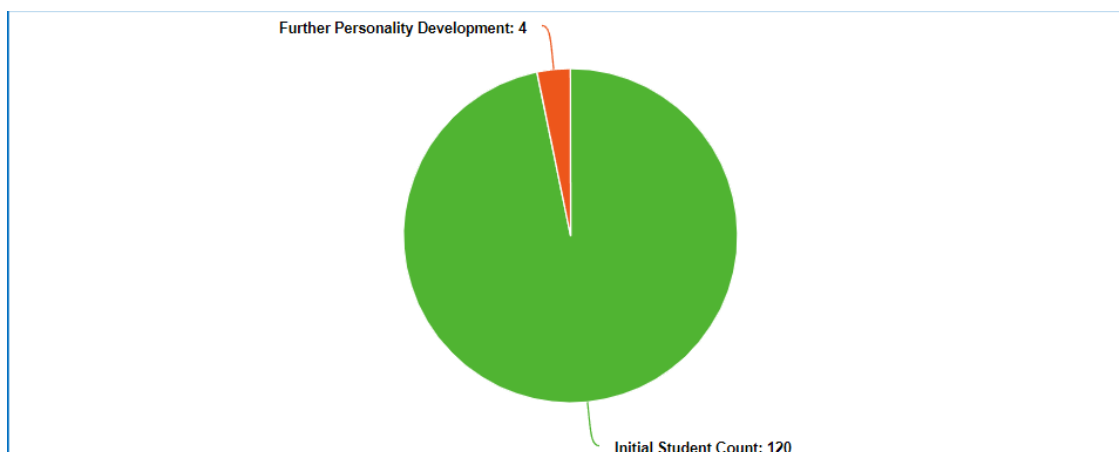

By using these activities, the students didn't just learn; they applied what they had learned in real-time. For us, this was the key to the session's success—making the lessons not just memorable but transformative. As the students participated, we saw them challenge themselves, communicate better with one another, and develop leadership skills that they would carry with them beyond the classroom.

The Impact: Growth in Numbers and Interest

We were thrilled by the response. Around **120** students from Gyanodaya School participated in the session, and their enthusiasm was contagious. Many of them approached us afterward, eager to learn more about leadership and how they could apply these concepts to their studies and personal lives. Seeing their passion for personal growth reassured us that we were on the right track.

This success didn't go unnoticed. Soon after, Padmodaya School invited us to conduct a similar program for their students. Although the space constraints limited the number of participants to 60, the energy and engagement in that session were no less remarkable. Students from both schools have since kept in touch, expressing their excitement for future sessions, eager to grow not just as students, but as leaders in their communities.

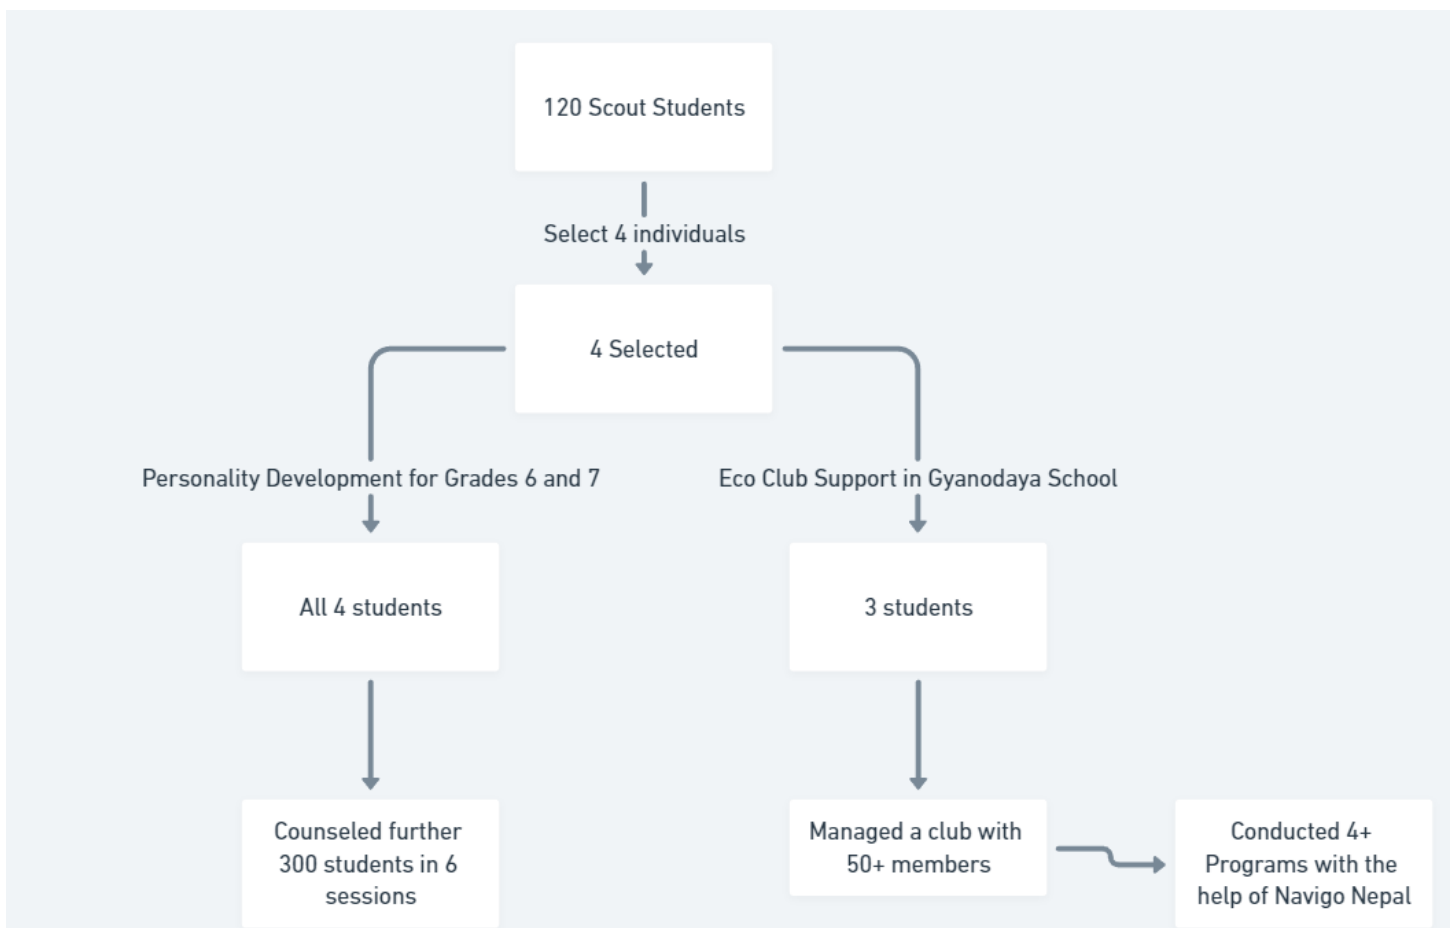

Looking Forward: A Vision for the Future

The excitement from these sessions didn't stop there. As we wrapped up the program, we made a significant announcement: a plan to work together with Gyanodaya School to create and manage Eco Clubs for their students. These clubs would focus on environmental conservation, combining the leadership skills the students had learned with a cause that would benefit their community and environment. We wanted the students to take the initiative in these clubs, applying their newfound leadership and personality development skills to real-world challenges.

By establishing this collaboration, we aim to create a sustainable impact—giving the students the tools to grow as leaders while taking tangible actions to conserve the environment. We believe that this approach will inspire them to continue learning, growing, and contributing to society in meaningful ways.

6.2 Key Collaborations

Our collaborations with organizations like UNICEF, USAID, AIESEC, and local schools have been instrumental in expanding our reach and impact. These partnerships have allowed us to bring our programs to more students and have provided valuable support in terms of resources and expertise.

Navigo Nepal Collaborations

Navigo Nepal: Bridging Education and Environmental Stewardship

Mission

At Navigo Nepal, we are driven by a deep passion for environmental conservation, a necessity we've come to understand through firsthand experience with the impacts of climate change and biodiversity loss. Living in a country where rapid glacial melting threatens both ecosystems and communities, we feel a profound responsibility to act. Our goal is to inspire future generations to recognize environmental stewardship as a noble cause they can champion for long-term impact.

Environmental Programs

We focus on empowering youth to engage with environmental issues by providing hands-on opportunities that connect them with the natural world. Our efforts emphasize the importance of conservation, equipping students with the knowledge and tools to meet environmental challenges head-on.

World Environment Day: A Call to Action

Event Highlights

On June 5th, World Environment Day, Navigo Nepal led a series of environmental awareness events in a community school in Kathmandu Metropolitan City. These activities included:

- **Bottle Gardening Projects:** Students repurposed plastic bottles to create gardens, demonstrating sustainable practices in a practical, engaging way.

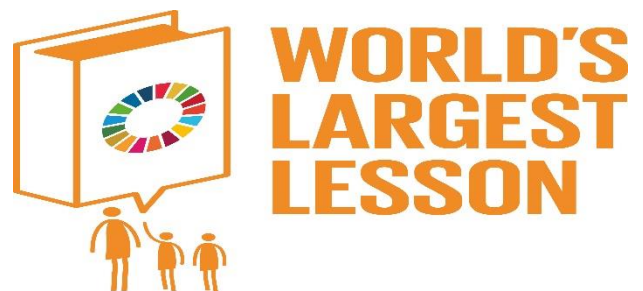

- **Environmental-Themed Face Painting:** Creative expression sessions allowed students to reflect on environmental concerns through art.
-
- **Painting Exhibitions & Informative Pamphlets:** A showcase of student-created art paired with educational pamphlets focused on environmental issues.

- **Rally for Environmental Awareness:** Students, teachers, and community members took to the streets to raise awareness about environmental concerns and actions needed.
- **Educational Sessions for Children:** Interactive discussions on the environmental challenges we face and steps children can take to contribute to positive change.

These events garnered widespread attention, being featured on the official social media pages of both UNICEF Nepal and USAID Clean Air, further amplifying the impact of our work.

Project with AISEC

Navigo Nepal got an incredible opportunity to collaborate with AISEC, a global organization on their program on Sustainable Development Goals (SDG). Members of Navigo Nepal were distributed across different schools of Kathmandu alongside other volunteers of AISEC. SDG 13- Climate Action was chosen among other SDGs to make young students aware about the climate change that has been happening because of mankind and how they can reduce it through their efforts in home and school.

Before going to school for the session, two orientation sessions were given by AISEC heads to event goers on how to carry out the program. Different roles were assigned to each organizer on each class of a school. Most of the schools didn't have proper infrastructure to incorporate PowerPoint presentations, so we had to carry out our session through other ways like group discussions, activities and games. At first, we introduced the concepts of SDG and United Nation, climate change and how organizations like AISEC are addressing the issue of climate change worldwide. We made the topic of climate change relatable to students' daily lives and how it can be reduced through small steps from home and school. We organized fun games like drawing and also awarded the top performing students.

Main challenge during this program on almost every school was to control the students as they were noisy and uninterested at first. But as the session progressed with more fun activities and crucial topics, student started to actively engage with us and asked questions and gave various solutions as well. Students shared creative ideas like making baskets from waste plastic, reusing waste hair and many others out of the box examples.

Some glimpses of AISEC X Navigo Nepal program

The following table shows information on schools and members from Navigo Nepal who participated in it:

What students Say about us?

“Navigo Nepal's regarded as an incredible corporation aiming the immense empowerment of infinite Nepali youths. Navigo Nepal's team have ideally apprised the school students of crucial techniques to dispute challenges and intense problem-solving skills. Navigo's arts of evolving confidence in students, enabling the children to share infinite perceptions are precisely appreciated. Navigo cleared unrequited questions and addressed plenties of unsolved issues evermore dealt by school students. Navigo Nepal victoriously persuaded the advancians to aspire a compelling future, guiding fledgling souls to leverage experiences. Navigo firmly intended to serve vast, dynamic learnings and receive visionary insights to and from the students in an amusing aspect. Every student pleaurably assisted the animated session. I candidly admired navigo's intent to grant enduring cognizance and opportunities to every thriving mortals, simplifying millions of flourishing lives. Navigo Nepal's incredibly determined regarding their errand to uncover the expertness of Nepalese youths at elevated levels. Navigo's teachings have ecstatically inspired me to achieve a secured future. Indubitably, Navigo Nepal's a brilliant organization revolutionising young lives to result excellence. Representing the Advanced family, I express our sincere gratitude to the entire Navigo Nepal's team for the phenomenal session. We incredulously appreciate Navigo Nepal's persistence.”

Suprajnee Devkota
Student, Advance E.B High School

Testimonial

Navigo Nepal an non profitable firm which is currently trying to empower students and youth throughout Nepal by conducting various sessions and providing the ability to solve problems , helping in growth of mindsets as well as boosting self esteem. Navigo proceeds to evolve confidence amongst students and youths which is undoubtedly appreciated. I personally am fond of Navigo's art of helping and granting opportunities to millions of lives. Navigo inspired and motivated me and my friends to overcome our fears and to leave no regrets behind .The best part about Navigo family is that the workers are very friendly , understanding and sweet . I just got to experience only one session but throughout the day I found myself engaged to various fun activities and got to know many lessons about life and so on. I truly appreciate the effort they put on the whole session with out scolding us but showing their care and compassion.I wish that Navigo Nepal will successfully accomplish their objectives of empowering each and every youth all over the Nepal. I'd like to express my sincere gratitude to you guys for motivating me to follow my hobbies and passion while studying. Thanks to you Navigo Nepal for providing us the chance to experience such wonderful time with knowledge.Looking forward for seeing you again !

Priyansha Khadka
Arunina Secondary School

Expanding Nation wide

The central idea behind the formation of Navigo Nepal is to provide essential exposure to underprivileged students of the country. For that, we have travelled to numerous districts and met with a lot of students coming from every caste, ethnicity and background. Our mission to connect with communities across Nepal has led us to various villages, including Nuwakot, Dhading, Butwal, Rasuwa, Rupandehi, and Banke.

We believe that we are still missing a lot of such students scattered all over the country in rural areas of Nepal and sometimes even in urban schools. Some places don't even have the proper infrastructure to provide normal education to students where the concept of ECAs and clubs are rarely understood and implemented. We aim to reach out to these areas and expand our programs nationwide.

For meeting this purpose, navigo Nepal has successfully organized many sessions in different districts of Nepal. Up until now, we have reached to 4 districts and we are determined to take this number to more than 15 districts. After getting proper amount of funding and recognition, we will be reaching in every possible corner of the country where there is lack of exposure to students.

Sustainability

One of the most important aspects of success of any organization is its sustainability. At this stage, Navigo Nepal has been making success after success in every school we go. To continue this progress in the future as well and to sustain, many plans and strategies have been formulated like:

A) Volunteer recruitment: We, as an organization which aims to reach to every corner of the country, need to have a lot of individuals working on it. For that, we have formulated a way to recruit volunteers which involves application process and interviews. We look for individuals who have passion for doing something good for their community and who can actively contribute to our common goals.

B) Concept of district ambassador- Navigers: Navigo Nepal identifies a student from schools of each district as someone who has exceptional leadership and teamwork capabilities to represent Navigo Nepal for their district. They will be called ambassadors or Navigers as we like to call it and will provide us information about various clubs established by us there and condition of ECAs in their schools. That way, it'll be easier for us to understand what a school is in need of so that we can make tailored content for them.
